

# HEMANADHAN

AWS Support Engineer | Cloud Operations | IT Support | ML Data Engineering

## PROFESSIONAL SUMMARY

---

AWS Support Engineer with 3.5+ years of experience in cloud operations, technical support, IT support, incident management, and ML data engineering. Specialized in AWS Bedrock (L3), SLA management, ticket management, and automated pipeline development using AWS EventBridge, S3, SES, IAM, and Lambda. Experienced in Python, SQL, data pipeline development, computer vision annotation, and cross-functional team collaboration. Proven ability to handle high-volume production support, SEV2 incidents, on-call rotations, and large-scale account implementations independently.

## PROFESSIONAL EXPERIENCE

---

**Support Engineer I – AWS Bedrock (L3) | Amazon Web Services | Chennai** Jun 2024 – Mar 2026

- Managed 300+ customer tickets daily on AWS Bedrock support queue — triaging, troubleshooting, and resolving API failures, model access issues, and quota requests within SLA across enterprise accounts.
- Handled SEV2 incident escalations end to end — assessing business impact, coordinating with internal AWS service teams, and ensuring timely resolution with clear customer communication throughout.
- Independently managed end-to-end activation of 3,000+ priority customer accounts during new Bedrock model and region launches on a single on-call shift — coordinating with service teams and validating all configurations.
- Engineered automated quota reporting pipeline (EventBridge, S3, SES) — eliminating 8+ hours per week of manual work with 100% on-time, zero-error delivery.
- Built daily EOL monitoring automation using Python web scraping — tracking Bedrock model and region deprecations in real time, enabling faster ticket resolution for customers on deprecated models.
- Owned Matador tool QA lifecycle — functional testing, bug triage, and codebase updates for newly launched Bedrock models and regions; resolved customer-reported Matador bugs via Slack and ticketing system.
- Mentored junior engineers on escalation handling and SOP usage; collaborated with AWS product and engineering teams to improve quality and flag recurring issues.

**ML-Data Associate (CXQO) | Amazon | Chennai** Aug 2022 – May 2024

### Just Walk Out (JWO) Technology — Computer Vision and ML Data Operations

- Performed frame-level video annotation and computer vision data labeling to train AI models for Amazon's checkout-free retail technology across Amazon Go stores, stadiums, and airports.
- Validated sensor fusion data (cameras, weight-sensitive shelves, RFID) to ensure labeling accuracy and AI model reliability; escalated edge-case frames via structured error-reporting protocols.

### GO-AI Operations — Robotic Fulfillment Center AI Support

- Audited fulfillment center stow videos and annotated product placement to improve AI/ML model accuracy for warehouse robotics; exceeded quality and productivity KPIs in 24/7 environment.

**Customer Service Associate | Tech Mahindra (Flipkart) | Chennai** Jun 2021 – Nov 2021

- Managed high-volume inbound customer interactions, resolving queries efficiently with strong communication skills and SLA compliance across voice process operations.

## TECHNICAL SKILLS

---

**Cloud and AWS Services:** AWS Bedrock, AWS EventBridge, Amazon S3, Amazon SES, AWS IAM, AWS Lambda, AWS CloudWatch

**IT Support and ITSM:** Incident Management, SLA Management, SEV2 Handling, Ticket Management, ITIL, On-Call Support, Escalation, SOPs

**Programming:** Python, SQL, Web Scraping, MATLAB

**ML and Data Engineering:** Data Pipeline Development, ML Data Validation, Video Annotation, Computer Vision Labeling, Sensor Fusion QA, Data Preprocessing, EOL Monitoring Automation

**Tools and Platforms:** Jira, Atlassian Suite, Slack, Google Workspace, macOS, Windows, Change Request Management

**Operations:** Quota Provisioning, Process Automation, Runbooks, Cross-Functional Collaboration, Mentoring, Performance Coaching

## EDUCATION

---

**B.E. — Electronics and Communication Engineering** | Siddhartha Institute of Science and Technology, JNTUA | Apr 2020
